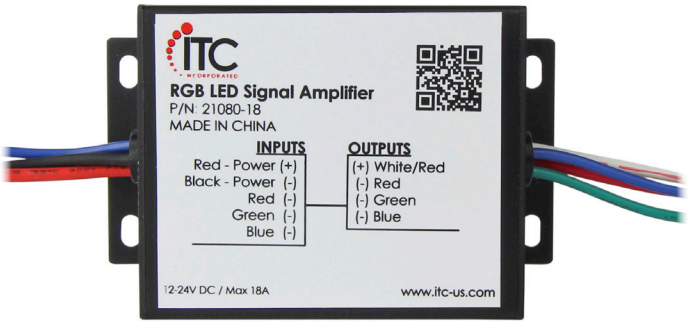
VersiControl™ RGB Signal Amplifier



Features

- The signal amplifier provides an additional power input that helps maintain the RGB signal over long runs and prevents dimming or sync issues with other RGB zones.
- ITC recommends an amplifier when running 90% of full load with 14 gauge wire and at lengths of 20' or more.
- Lights cannot be daisy chained but can be run in parallel as long as the amperage is not exceeded on the amplifier.

Product Details

Housing Material	Aluminum
Voltage	12-24V DC
Current	18A Max* 6A Max per RGB Wire
IP Rating	IP66
Operating Temp.	-4°F to 140°F

Part Number: 21080-18-XX
