

Attune™ Solar Assist Handle

INSTALLATION INSTRUCTIONS

Part#: 86402

PARTS/TOOLS NEEDED:

		
Assist Handle	Mounting Screws (Not Provided)	Power Drill

IMPORTANT SAFETY INSTRUCTIONS. READ CAREFULLY FOR YOUR PROTECTION AND SAVE ALL INSTRUCTIONS.

- Make sure there is strong support structure behind the handle. Failure to install into adequate support will void the warranty and runs the risk of pulling the handle out of the wall.
- To avoid a hazard to children, account for all parts and destroy all packing materials.
- Battery will last up to 60 hours on a full charge. Brightness and intensity will decrease over time. Note, partial sunlight or shaded areas will not achieve a full charge on the battery.
- Only use rechargeable NiMH batteries, lead acid batteries will melt or explode in the sun.

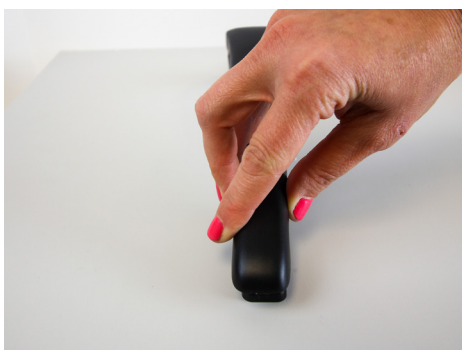

1. Determine installation location, mark screw holes and drill pilot holes.

2. If installing the solar handle, remove the battery protector and insert the battery into the solar cell box. Slide the solar box into the opening with the LEDs facing toward the unit.

3. Screw in handle and snap decorative end caps over the ends.
