

Mod™ Table Leg System

Features

- Perfect for situations that require the table to be mounted in multiple locations without the addition of multiple tables and legs to store
- Robust, plastic shim provided to get proper spacing for rotation off of the wall
- The mounting plate on the wall eliminates the bulky floor bases from traditional legs
- The leg is height adjustable with a 360° swivel to go from eating to working
- Easy, quick removal makes the system perfect to stow away when the table is not being used
- Standard version (BAL) uses a cam lock handle for tightening while marine version (JAL) uses a ratchet style handle
- Tilting version can be adjusted in 22.5° and allows the table to be stored flat against the wall
